- The Industrial Disputes Act should be amended to make a reasonable notice mandatory in all cases. It would also be desirable to introduce the system of "strike ballot" whereby a strike can be called only if it is supported by a qualifying majority of the workers.
- At present there is no time limit for filing disputes under the Industrial Disputes Act. This encourages pilling up of old disputes leading to delays in courts. A time limit of 3 years should be stipulated within which a dispute could be referred for adjudication.
- The Contract Labour (Regulation and Abolition) Act needs to be suitably amended to allow all peripheral activties to be freely outsourced from specialised firms, even if it means employees of the specialised firms provide the services on the premises of the outsourcing units.
